

## Cai Walkowiak - Campaign Statement

I have spent 6 years in our town and jumped right into developing our community in every way I could think to improve the quality of life for both the existing townspeople, specifically with our broadband initiative and the library board, in addition to the future of our town. Our school and young attract future community members who contribute both socially and economically to our town.

We rely on bringing new life into our community as some move on for retirement or different economic opportunities. Our influx of families continue to express one of the primary reasons they chose Worthington as their community is our great school district and engagement of all our townspeople.

Covid has been a challenging time for everyone and our committee has done an excellent job of navigating these challenges supporting the school families and our community at large. We are seeing increased challenges as our town emerges from Covid and some are pushing ideologies that our school need not prioritize DESE diversity education requirements. Economic, race, and academic diversity through inclusion matter now more than ever. They absolutely matter, directly, for our community as we grow and as we have our young ones transition to larger diversity in our great country.

I have been honored to be a part of that process and hope to continue for as many years as possible.

I urge you to come vote for both myself and our chairperson Alison Todd who has done an amazing job of collaborating and leading community engagement while empowering our superintendent to deliver what our community needs.

Thank you so much for your vote and please reach out in any way you want to directly engage,

Cai Walkowiak
