MZ

Hi Bart and Board,

Confirming receipt. We will submit a response back as soon as possible on the BOH questions.

We don't see any questions for us in the document from Joseph Shaw, so we will not have any additional responses back on that document. We received a copy of a letter from John Sullivan, Prime Water Operator and Commissioner for the Worthington Fire District. This was addressed to the Planning Board, have you received and is this on the record as well for the project?

To note, we have a scheduled phone call with the Fire Chief tomorrow with our consultant FRA to discuss some of his questions and review our drafted Emergency Response Plan and Hazard Mitigation Analysis for the project. We will be providing final drafts of these two documents to the Board after they are finalized with the Fire Chief.

We look forward to receiving the PARE Corp document and if it is available for our review today or tomorrow, it would be much preferred to receive, to give us as much time as possible to respond back to the Board with time for your review in advance of the next scheduled hearing on May 28th.

Regards,

Michael Zhe  
Senior Director, Project Development

**Subject:** Request for responses

Good morning - The Worthington Planning Board, with assistance from PARE Corp, has reviewed the collection of information and testimony received to date regarding your proposed project at 190 Ridge Road. We will be asking for your response to a variety of documents.

Today I am asking for response to two documents we received from officials in town: one from Dianne Brenner, chair of the Board of Health, and one from Joseph (Trip) Shaw, Water Operator for the Worthington Fire District. We are submitting these to you as they were submitted to us, and look forward to your responses to their questions. Please note, the highlights in the letter from Dianne Brenner are not ours - it is how the document was submitted to us.

We hope to have additional documents for you to respond to soon: one from the Fire Chief and one from PARE Corp which synthesizes many questions raised in the hearing as well as questions the engineers have. Our goal is to have those to you early next week.

Finally, I understand your check covering the technical review was received by the town: thank you.

Bart
