Response for Bluewave

Thank you for your response and for addressing the concerns regarding stormwater management and the existing drainage infrastructure.

I appreciate the information provided. As Highway Superintendent, I will continue to monitor the Town's drainage infrastructure in the areas surrounding the project to ensure that there is no damage, deterioration, or unanticipated changes to existing drainage patterns or infrastructure as a result of the project.

Should any issues or changes be observed, I will document and communicate them accordingly.

Thank you for your cooperation.

Sincerely,

Rheal Labrie, Highway Superintendent
Town of Worthington
Highway Department
